## Services Overview:

### Market Analysis

A Top-down consultation on the AI market or a specific segment. Designed for investors seeking strategic insights and a broader understanding of the AI landscape, including market trends and emerging opportunities.

### Company Review

A preliminary assessment of an AI firm or startup. This service provides an overview of a company's technology, business model, and growth potential. It includes technical analysis, leadership interviews, and product assessments, suitable for smaller investments.

### Technical Due Diligence

A comprehensive evaluation of an AI firm or startup. This in-depth service assesses a company's capabilities, viability, and investment potential. It includes detailed technical analysis, leadership and team interviews, product usability studies, code and architecture reviews, regulatory and market risk assessments, and competitive landscape analysis. Ideal for larger investments or M&A transactions.

### AI Fundamentals Workshops

Workshops for executives and policymakers to learn AI fundamentals and better understand the technology and its implications.
